EDUCATION

University of British Columbia

Vancouver, BC

Bachelor of Applied Science – Computer Engineering (4th Year) (CGPA – 86%)

Sep. 2022 – Present

Courses: Data Structures and Algorithms, Principles of Software Construction, Introduction to Relational Databases

Certificates: Machine Learning A-Z: AI, Python & R, The Complete 2024 Web Development Bootcamp

TECHNICAL WORK EXPERIENCE

Software Development Engineer Intern

May 2026 – August 2026

Amazon - AFFS ARS Team

Vancouver

- Implemented a **serverless Java automation system** using **AWS Lambda**, **DynamoDB**, and **EventBridge** to replace an unscalable manual scheduling process across ~**74000** annual schedules for Amazon's accountants
- Built resilient high-volume event processing with **SQS** and **CloudWatch**, using per-message failure reporting, retry logic, and a dead-letter queue to isolate and monitor failures
- Developed a **React-based** review UI enabling **160+** accountants to approve, reject, or edit computed schedules before activation, while maintaining auditability of all actions

Software Engineer Co-op

January 2025 – January 2026

Dialpad - CoreUX Team

Vancouver

- Designed and implemented scalable backend microservices in **Python** using **REST APIs** and **GCP** services for custom logo uploads, media retrieval in chats, and efficient pagination
- Streamlined **API performance** by optimizing logic and removing redundant response parameters, reducing response times by **80%** while contributing to code reviews and design discussions to ensure scalable features
- Collaborated with designers to develop **Vue.js** components by building reusable UI elements and managing state with **Pinia**, while ensuring responsive design across all devices to enhance the overall user experience

Software Developer Intern

May 2024 – August 2024

University of Calgary IT Department

Calgary

- Created a dynamic website to facilitate the organization, share-ability, and storage of audit reports using **HTML**, **CSS**, and **JavaScript**
- Implemented authentication mechanisms to enforce role-based access control, safeguarding sensitive reports and limiting access exclusively to authorized personnel

DESIGN TEAM EXPERIENCE

Applied AI Lead

May 2025 – May 2026

Agrobot Engineering Design Team

University of British Columbia

- Led 20 engineers developing real-time vision systems for autonomous robotics, integrating advanced deep learning models into ROS for accurate crop detection
- Directed three machine learning projects, applying **object localization** to identify crops, **image segmentation** to distinguish crop from weed, and **reinforcement learning** for autonomous navigation

Software Developer

February 2023 – May 2024

Launchpad Software Engineering Design Team

University of British Columbia

- Collaborated with a 15-member interdisciplinary team to design and develop software solutions for external stakeholders, following **agile** practices

PROJECTS

Ride Share App ([GitHub](#)) | React Native, TypeScript, PostgreSQL, Stripe

November 2025

- Built a ride-sharing app enabling users to request rides, track live routes, and pay securely in-app

Expense Split Manager ([GitHub](#)) | React, JavaScript, Convex

October 2025

- Developed an expense-tracking app that syncs shared balances in real time, eliminating manual reconciliation

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, C, C++, SQL, HTML, CSS

Frameworks: React.js, Vue.js, Node.js, Next.js, Express.js, React Native, CI/CD Integration, JUnit, Mocha/Chai

Developer Tools: AWS, GCP, GitHub, AI/ML (TensorFlow, Scikit-learn), PostgreSQL, MongoDB, Oracle DB
